Author Index for Papers in Volume 27

Pages are numbered consecutively through the volume: 1–92, January; 93–196, March; 197–299, May; 301–424, July; 425–528, September; and 529–622, November.

Baldwin, E. C.
50 see West, M. A.

Bargon, Joachim, Shamsher Mohmand, and Robert J. Waltman
330 *Electrochemical Synthesis of Electrically Conducting Polymers from Aromatic Compounds*

Barry, P. L.
41 *Failure Diagnosis on the LT1280*

Beichter, F., O. Herzog, and H. Petzsch
558 *SLAN-4—A Language for the Specification and Design of Large Software Systems*

Blaauw, G. A., A. J. W. Duijvestijn, and R. A. M. Hartmann
497 *Optimization of Relational Expressions Using a Logical Analogon*

Bogy, D. B.
171 see Bugdayci, N.

Bugdayci, N., D. B. Bogy, and F. E. Talke
171 *Axisymmetric Motion of Radially Polarized Piezoelectric Cylinders Used in Ink Jet Printing*

Burger, W. G. and C. W. Weigel
11 *Multi-Layer Ceramics Manufacturing*

Casey, R. G. and C. R. Jih
386 *A Processor-Based OCR System*

Clarke, T. C., J. C. Scott, and G. B. Street
313 *Magic Angle Spinning NMR of Conducting Polymers*

Cleverley, D. S.
4 *Product Quality Level Monitoring and Control for Logic Chips and Modules*

Comfort, Webb T.
219 *A Fault-Tolerant System Architecture for Navy Applications*

Conway, H. D.
590 see Lee, H. C.

Cormier, R. L., R. J. Dugan, and R. R. Guyette
206 *System/370 Extended Architecture: The Channel Subsystem*

Curtin, J. J. and J. A. Waicukauski
27 *Multi-Chip Module Test and Diagnostic Methodology*

DeFoster, S. M.
50 see West, M. A.

Diaz, A. F. and B. Hall
342 *Mechanical Properties of Electrochemically Prepared Polypyrrole Films*

Dooley, B. J.
59 *A Model for the Prediction of Assembly, Rework, and Test Yields*

Dubrulle, Augustin A.
582 *A Class of Numerical Methods for the Computation of Pythagorean Sums*

Dugan, R. J.
206 see Cormier, R. L.

Duijvestijn, A. J. W.
497 see Blaauw, G. A.

Economy, J.
321 see Geiss, R. H.

Eichelberger, E. B. and E. Lindbloom
265 *Random-Pattern Coverage Enhancement and Diagnosis for LSSD Logic Self-Test*

Fagin, Ronald and John H. Williams
133 *A Fair Carpool Scheduling Algorithm*

Farrell, Edward J.
356 *Color Display and Interactive Interpretation of Three-Dimensional Data*

Fleisher, Harold, Morton Tavel, and John Yeager
412 *Exclusive-OR Representations of Boolean Functions*

Franaszek, P. A.
464 *Address-Independent Routing for Local Networks*

Franaszek, P. A.
440 see Widmer, A. X.

Franchi, P., J. Gonzalez, P. Mantey, C. Paoli, A. Parolo, and J. Simmons
116 *Design Issues and Architecture of HACIENDA, an Experimental Image Processing System*

François, P. and A. Potocki
452 *Some Methods for Providing OSI Support in SNA*

Geiss, R. H., G. B. Street, W. Volksen, and J. Economy
321 *Polymer Structure Determination Using Electron Diffraction Techniques*

Geiss, R. H.
348 see Hanchett, V. E.

Gonzalez, J.
116 see Franchi, P.

Gum, P. H.
530 *System/370 Extended Architecture: Facilities for Virtual Machines*

Guyette, R. R.
206 see Cormier, R. L.

Hall, B.
342 see Diaz, A. F.

Hanchett, V. E. and R. H. Geiss
348 *Electron Microscopy of Carbon-Loaded Polymers*

Hartmann, R. A. M.
497 see Blaauw, G. A.

Hendriks, Ferdinand
273 *Bounce and Chaotic Motion in Impact Printer Hammers*

Herzog, O.
558 see Beichter, F.

Hoevel, L. W.
164 see Voldman, J.

Houser, D. E. and K. J. Lubert
598 *Automated Twisted-Pair Wire Bonding*

Iglehart, Donald L. and Gerald S. Shedler
472 *Simulation of Non-Markovian Systems*

Jih, C. R.
386 see Casey, R. G.

Knight, J.
164 see Voldman, J.

Koppelman, George M. and Michael A. Wesley
149 *OYSTER: A Study of Integrated Circuits as Three-Dimensional Structures*

Langdon, Glenn G., Jr.
94 see Martin, G. Nigel N.

Langdon, Glenn G., Jr.
107 see Todd, Stephen J. P.

Langlois, William E. and Ki-Jun Lee
281 *Digital Simulation of Magnetic Czochralski Flow Under Various Laboratory Conditions for Silicon Growth*

Lee, H. C. and H. D. Conway
590 *Bending and Stretching an Elastic Strip Around a Narrow Cylindrical Drum*

Lee, Ki-Jun
281 see Langlois, William E.

Lew, J. S.
181 *An Improved Regional Correlation Algorithm for Signature Verification Which Permits Small Speed Changes Between Handwriting Segments*

Lindbloom, E.
265 see Eichelberger, E. B.

Love, R. D.
432 see Park, D. I.-H.

Lubert, K. J.
598 see Houser, D. E.

Lyerla, J. R. and C. S. Yannoni
302 *High-Resolution Carbon-13 NMR of Polymers in the Solid State*

Mandelbrot, B.
164 see Voldman, J.

Mantey, P.
116 see Franchi, P.

Martin, G. Nigel N., Glen G. Langdon, Jr., and Stephen J. P. Todd
94 *Arithmetic Codes for Constrained Channels*

Martin, G. Nigel N.
107 see Todd, Stephen J. P.

McAuley, David
367 *Row-by-Row Dynamic Image Analysis of a Matrix of Scanned Points*

Meister, Bernd
545 *On Murphy's Yield Formula*

Milewski, A.
426 *Periodic Sequences with Optimal Properties for Channel Estimation and Fast Start-Up Equalization*

Miranker, G., L. Tang, and C. K. Wong
140 *A "Zero-Time" VLSI Sorter*

Mohmand, Shamsher
330 see Bargon, Joachim

Moler, Cleve and Donald Morrison
577 *Replacing Square Roots by Pythagorean Sums*

Morrison, Donald
577 see Moler, Cleve

Padegs, A.
198 *System/370 Extended Architecture: Design Considerations*

Paoli, C.
116 see Franchi, P.

Park, D. I.-H. and R. D. Love
432 *An Analysis of the Tolerance to Crosstalk Noise of a Pulse Width Modulation System*

Parolo, A.
116 see Franchi, P.

Petzsch, H.
558 see Beichter, F.

Pierson, R. L. and T. B. Williams
35 *The LT1280 for Through-the-Pins Testing of the Thermal Conduction Module*

Potocki, A.
452 see François, P.

Radin, George
237 *The 801 Minicomputer*

Rao, G. S. and P. L. Rosenfeld
247 *Integration of Machine Organization and Control Program Design—Review and Direction*

Rohrer, G. D.
400 see White, J. M.

Rosenfeld, P.
164 see Voldman, J.

Rosenfeld, P. L.
247 see Rao, G. S.

Sanborn, M. A.
20 *Precise Numerical Control for the Thermal Conduction Module*

Santisteban, Antonio
127 *The Perceptual Color Space of Digital Image Display Terminals*

Scott, J. C.
313 see Clarke, T. C.

Shedler, Gerald S.
472 see Iglehart, Donald L.

Simmons, J.
116 see Franchi, P.

Smith, F. D. and C. H. West
68 *Technologies for Network Architecture and Implementation*

So, Samuel
376 see Wahl, Friedrich

Stapper, C. H.
549 *Modeling of Integrated Circuit Defect Sensitivities*

Street, G. B.
313 see Clarke, T. C.

Street, G. B.
321 see Geiss, R. H.

Strole, Norman C.
481 *A Local Communications Network Based on Interconnected Token-Access Rings: A Tutorial*

Talke, F. E.
171 see Bugdayci, N.

Tang, L.
140 see Miranker, G.

Tavel, Morton
412 see Fleisher, Harold

Todd, Stephen J. P., Glenn G. Langdon, Jr., and G. Nigel N. Martin
107 *A General Fixed Rate Arithmetic Coding Method for Constrained Channels*

Todd, Stephen J. P.
94 see Martin, G. Nigel N.

Voldman, J., B. Mandelbrot, L. W. Hoevel, J. Knight, and P. Rosenfeld
164 *Fractal Nature of Software-Cache Interaction*

Volksen, W.
321 see Geiss, R. H.

Wahl, Friedrich, Samuel So, and Kwan Wong
376 *A Hybrid Optical-Digital Image Processing Method for Surface Inspection*

Waicukauski, J. A.
27 see Curtin, J. J.

Waltman, Robert J.
330 see Bargon, Joachim

Weigel, C. W.
11 see Burger, W. G.

Wesley, Michael A.
149 see Koppelman, George M.

West, C. H.
68 see Smith, F. D.

West, M. A., S. M. DeFoster, E. C. Baldwin, and R. A. Ziegler
50 *Computer-Controlled Optical Testing of High-Density Printed-Circuit Boards*

White, J. M. and G. D. Rohrer
400 *Image Thresholding for Optical Character Recognition and Other Applications Requiring Character Image Extraction*

Widmer, A. X. and P. A. Franaszek
440 *A DC-Balanced, Partitioned-Block, 8B/10B Transmission Code*

Williams, John H.
133 see Fagin, Ronald

Williams, T. B.
35 see Pierson, R. L.

Wong, C. K.
140 see Miranker, G.

Wong, Kwan
376 see Wahl, Friedrich

Wrenner, W. R.
285 *Large Multi-Layer Panel-Drilling System*

Wright, Robert E.
257 *Documenting A Computer Architecture*

Yannoni, C. S.
302 see Lyerla, J. R.

Yeager, John
412 see Fleisher, Harold

Ziegler, R. A.
50 see West, M. A.

Subject Index for Papers in Volume 27

Each index term below is accompanied by a page number and an author's name. With that name in the Author Index are the title of the paper and the names of coauthors, if any.

Subject	*Author*	*Page*
Algorithms		
Carpool scheduling	Fagin	133
Computing Pythagorean sums	Moler	577
Generalizing Pythagorean sum computation	Dubrulle	582
Handwriting recognition	Lew	181
VLSI sorter	Miranker	140
Analytical models		
Model for yield prediction	Dooley	59
On Murphy's yield formula	Meister	545
Quality level in logic chips and modules	Cleverley	4
Software-cache interaction	Voldman	164
Tolerance to crosstalk noise	Park	432
Arithmetic and logical unit design		
Exclusive-OR representation	Fleisher	412
Channel subsystem architecture		
370-XA: channel subsystem architecture	Cormier	206
Character recognition		
Handwriting recognition	Lew	181
Image thresholding	White	400
Processor-based OCR	Casey	386
Chemistry and chemical engineering		
C^{13} NMR of solid polymers	Lyerla	302
Electrochemical synthesis of conducting polymers	Bargon	330
Electron microscopy of carbon-loaded polymers	Hanchett	348
Mechanical properties of polypyrrole films	Diaz	342
NMR of conducting polymers	Clarke	313
Polymer structure via electron diffraction	Geiss	321
Coding theory		
Arithmetic codes for constrained channels	Martin	94
Fixed rate arithmetic coding	Todd	107
8B/10B transmission code	Widmer	440
Communications and communication networks		
Arithmetic codes for constrained channels	Martin	94
Fixed rate arithmetic coding	Todd	107
Interconnected token-access rings (tutorial)	Strole	481
Local network routing	Franaszek	464
Network architecture and implementation	Smith	68
OSI transport in SNA	François	452
Periodic sequences for start-up equalization	Milewski	426
Simulating non-Markovian systems	Iglehart	472
Compilers and interpreters		
801 minicomputer	Radin	237
Computational methods		
Computing Pythagorean sums	Moler	577
Generalizing Pythagorean sum computation	Dubrulle	582
Computer applications		
Failure diagnosis on LT1280	Barry	41
Optical testing of PC boards	West	50
Computer architecture		
370-XA architecture: virtual machine facilities	Gum	530
370-XA: architecture design considerations	Padegs	198
370-XA: channel subsystem architecture	Cormier	206
801 minicomputer	Radin	237
Computer architecture documentation		
Computer architecture documentation	Wright	257
Computer-controlled manipulators		
Numerical control for TCMs	Sanborn	20
Twisted-pair wire bonding	Houser	598
Computer organization and design		
Machine organization and control program integration	Rao	247
801 minicomputer	Radin	237
Data-definition facilities		
SLAN-4—software specification language	Beichter	558
Data structures and accessing		
Relational expression optimization	Blaauw	497
Database design		
Relational expression optimization	Blaauw	497
Design automation		
Circuits as 3D structures	Koppelman	149
Display technology		
Color display of complex data	Farrell	356
Image processing system architecture	Franchi	116
Optical-image processing inspection	Wahl	376
Perceptual color space	Santisteban	127
Documentation and editing		
Computer architecture documentation	Wright	257
Electrical packaging technology		
MLC manufacturing	Burger	11
Multi-chip module test	Curtin	27
Optical testing of PC boards	West	50
Panel-drilling system	Wrenner	285
TCM testing	Pierson	35
Twisted-pair wire bonding	Houser	598
Electromagnetic theory		
Tolerance to crosstalk noise	Park	432
Error control and recovery		
Fault-tolerant system architecture	Comfort	219
Error control codes		
8B/10B transmission code	Widmer	440

Fabrication
MLC manufacturing — Burger — 11
Numerical control for TCMs — Sanborn — 20
Panel-drilling system — Wrenner — 285
Twisted-pair wire bonding — Houser — 598

Fault-tolerant systems
Fault-tolerant system architecture — Comfort — 219

Films
Mechanical properties of polypyrrole films — Diaz — 342

Graphics
Color display of complex data — Farrell — 356
Image processing system architecture — Franchi — 116
Integrated circuits as 3D structures — Koppelman — 149
Perceptual color space — Santisteban — 127

High-reliability, high-availability systems
Fault-tolerant system architecture — Comfort — 219

Image processing
Color display of complex data — Farrell — 356
Image thresholding — White — 400
Optical-image processing inspection — Wahl — 376
Perceptual color space — Santisteban — 127
System architecture — Franchi — 116

Impact printer technology
Motion in impact print hammers — Hendriks — 273

Ink jet printing
Ink jet squeeze tube analysis — Bugdayci — 171

Integrated circuit design
Circuits as 3D structures — Koppelman — 149
Modeling defect sensitivities — Stapper — 549

Interpretive-execution architecture
370-XA architecture: virtual machine facilities — Gum — 530

I/O channel subsystems
370-XA: channel subsystem architecture — Cormier — 206

I/O technologies
Motion in impact printer hammers — Hendriks — 273

Large-scale integration
Integrated circuits as 3D structures — Koppelman — 149
Modeling defect sensitivities — Stapper — 549
VLSI sorter — Miranker — 140

Local area networks
Local network routing — Franaszek — 464
Simulating non-Markovian systems — Iglehart — 472

Logic design and technology
Exclusive-OR representation — Fleisher — 412
Random-pattern LSSD logic self-test — Eichelberger — 265

Logic design testing
Failure diagnosis on LT1280 — Barry — 41
Random-pattern LSSD logic self-test — Eichelberger — 265
TCM testing — Pierson — 35

Logic self-test
Random-pattern LSSD logic self-test — Eichelberger — 265

LSI chip design automation
Integrated circuits as 3D structures — Koppelman — 149

Manufacturing technology
Dynamic image analysis — McAuley — 367
MLC manufacturing — Burger — 11
Model for yield prediction — Dooley — 59
Multi-chip module test — Curtin — 27
Numerical control for TCMs — Sanborn — 20
Optical testing of PC boards — West — 50
Panel-drilling system — Wrenner — 285
Quality level in logic chips and modules — Cleverley — 4
TCM testing — Pierson — 35

Materials
Mechanical properties of polypyrrole films — Diaz — 342
Simulation of Czochralski flow in Si — Langlois — 281

Mathematics (applied)
Carpool scheduling algorithm — Fagin — 133
Computing Pythagorean sums — Moler — 577
Deflected forms of bent strips — Lee — 590
Exclusive-OR representation — Fleisher — 412
Generalizing Pythagorean sum computation — Dubrulle — 582
Ink jet squeeze tube analysis — Bugdayci — 171
On Murphy's yield formula — Meister — 545
Software-cache interaction — Voldman — 164

Measurement
Optical-image processing inspection — Wahl — 376

Mechanics and mechanisms
Deflected forms of bent strips — Lee — 590
Ink jet squeeze tube analysis — Bugdayci — 171

Medical electronics
Color display of complex data — Farrell — 356

Microprocessor-based applications
Dynamic image analysis — McAuley — 367
Processor-based OCR — Casey — 386

Models and modeling
Local network routing — Franaszek — 464
Model for yield prediction — Dooley — 59
Modeling circuit defect sensitivities — Stapper — 549
Simulating non-Markovian systems — Iglehart — 472

Network architecture
Interconnected token-access rings (tutorial) — Strole — 481
Network architecture and implementation — Smith — 68

Office machines and systems
Processor-based OCR — Casey — 386

Operating systems
OSI transport in SNA — François — 452

Optical character recognition
Image thresholding — White — 400
Processor-based OCR — Casey — 386

Optics
Optical-image processing inspection — Wahl — 376
Perceptual color space — Santisteban — 127

Optimization
Relational expression optimization — Blaauw — 497

Performance analysis
Software-cache interaction — Voldman — 164

Physics and physical chemistry
Simulation of Czochralski flow in Si — Langlois — 281

Plant automation
Dynamic image analysis — McAuley — 367
Failure diagnosis on LT1280 — Barry — 41

Polymers
C^{13} NMR of solid polymers — Lyerla — 302
Electrochemical synthesis of conducting polymers — Bargon — 330
Electron microscopy of carbon-loaded polymers — Hanchett — 348
Mechanical properties of polypyrrole films — Diaz — 342
NMR of conducting polymers — Clarke — 313
Polymer structure via electron diffraction — Geiss — 321

Printing technology
Ink jet squeeze tube analysis — Bugdayci — 171
Motion in impact print hammers — Hendriks — 273

Programming and programming languages
SLAN-4—software specification language — Beichter — 558

Programming systems development
Machine organization and control program integration — Rao — 247
SLAN-4—software specification language — Beichter — 558

Quality control
Modeling circuit defect sensitivities — Stapper — 549
Quality level in logic chips and modules — Cleverley — 4

Random-pattern logic testing
Random-pattern LSSD logic self-test — Eichelberger — 265

Reduced-instruction-set computers
801 minicomputer — Radin — 237

Relational databases
Relational expression optimization — Blaauw — 497

Remote sensing
Image processing system architecture — Franchi — 116

Scheduling
Carpool scheduling algorithm — Fagin — 133

Signal processing
Periodic sequences for start-up equalization — Milewski — 426
Tolerance to crosstalk noise — Park — 432
8B/10B transmission code — Widmer — 440

Signature verification
Handwriting recognition — Lew — 181

Simulation
Simulating non-Markovian systems — Iglehart — 472
Simulation of Czochralski flow in Si — Langlois — 281

Sorting
VLSI sorter — Miranker — 140

Spectroscopy
C^{13} NMR of solid polymers — Lyerla — 302
NMR of conducting polymers — Clarke — 313
Polymer structure via electron diffraction — Geiss — 321

Statistics
On Murphy's yield formula — Meister — 545

Storage hierarchies
Software-cache interaction — Voldman — 164

Structured programming
OSI transport in SNA — François — 452

System/370 Extended Architecture (370-XA)
370-XA architecture: virtual machine facilities — Gum — 530
370-XA: architecture design considerations — Padegs — 198
370-XA: channel subsystem architecture — Cormier — 206

Systems architecture and development
Fault-tolerant system architecture — Comfort — 219
Machine organization and control program integration — Rao — 247
Network architecture and implementation — Smith — 68
370-XA: architecture design considerations — Padegs — 198

Telecommunications
Interconnected token-access rings (tutorial) — Strole — 481
Periodic sequences for start-up equalization — Milewski — 426

Virtual-machine facilities
370-XA architecture: virtual machine facilities — Gum — 530
